B.S. Civil Engineering, 1977  
Manhattan College, Bronx, NY

## REGISTRATION

Registered Professional Engineer, Maine, New York  
and North Carolina

## PROFESSIONAL ASSOCIATIONS

Structural Engineers Association of Maine

Mr. McConnell provides the firm over 28 years of experience as a Professional Engineer in the fields of industrial, manufacturing, and power generation. Clayton's experience has included design and management on projects ranging from green-field to complex retrofit including the design of new buildings, the rehabilitation of existing buildings, machine foundation design, and concrete sanitary engineering structures.

In power generation his experience includes fossil, hydro, nuclear, solar and wind. His manufacturing experience has included projects in the food & beverage field as well as chemical and defense manufactures. Experience in heavy industry includes extensive work in the pulp & paper industry and waste water treatment.

Clayton possesses a comprehensive knowledge of design standards and codes as well as extensive experience working with structures of steel, concrete, masonry, timber, and aluminum. He is proficient in the use of the latest computer software for analysis and design.

With over 28 years of design, project management and field experience – primarily within a consulting environment, Mr. McConnell brings Mohlin & Company valuable skills in completing high quality projects within budget and on schedule.
