Mr. Mohlin is Owner and President of Mohlin & Company. He is responsible for business development, marketing, client contact, project constructability, and overall company performance.

With more than 35 years experience in both construction and engineering, he offers guidance to projects with regard to constructability, practical design and scope and budget control. Mr. Mohlin offers considerable design experience in heavy industrial projects, particularly in the coal, gas, and wood power generation facilities and the pulp and paper field, with emphasis on “shut downs” and “retrofits” requiring building modifications, equipment foundation design and the structural aspects of paper machine and other major process equipment rebuilds and installations.
