

# SEAN D. RUSSELL

---

## EDUCATION

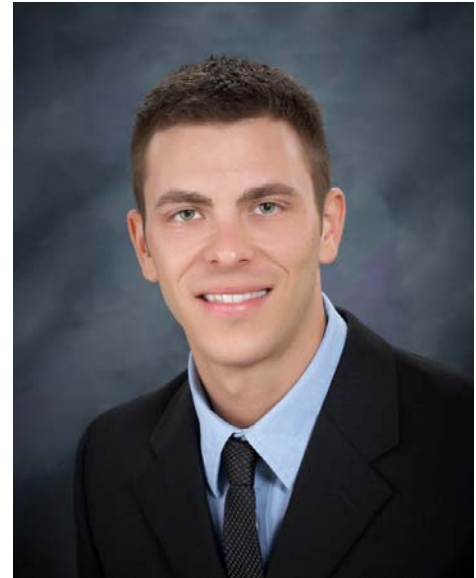

Associates Degree  
Civil Engineering Technology  
Central Virginia Community College

Sean Russell has joined Mohlin & Company in the capacity of Engineering Technician. Sean earned an Associates degree in Civil/Structural Technology, including environmental science courses and has had several years experience in residential construction.

Sean is currently working as a draftsman, developing AutoCAD drawings for projects including site layouts for ground mounted PV Solar Array projects, access platforms around process tanks at a chemical manufacturing facility, boiler room additions at a plastics manufacturer, structural repairs to deteriorated building components at a paper mill, and platforms to access piping valves and process equipment and canopies over HRSG ammonia skids at a gas fired power generation facility.

In addition to drafting duties, Sean has performed shop drawing reviews and has participated in many field surveys obtaining dimensional information and then field checking our drawings as part of our quality assurance program.

Combining Sean's college experience with his practical construction experience provides him with the background and training to become a valuable addition to our staff.
