

## STRUCTURAL DESIGNER/CAD DRAFTER

### Job Description:

Mohlin & Company is looking for an experienced structural designer/Cad Drafter with the skills to take on the challenge of developing CAD drawings for major industrial and commercial projects. Successful candidate would create complete structural drawings of foundation and building framing as part of an outstanding team of engineers, designers and drafters committed to producing quality drawings for a wide variety of projects.

### Job Requirements:

- Associates Degree in Architectural or Building Technologies
- 3-5 years of increasing responsibility for the drafting of industrial or commercial projects
- Proficient in the latest version of AutoCAD
- Ability to develop detailed drawings from engineer's sketches with minimum guidance
- Ability to work with other team members in a fast paced environment

**Salary Range:** Hourly Wage \$20.00 to \$24.00

**Benefits:** Company Benefits: Mohlin & Company is committed to offering the best package of benefits available in the industry. They include participation in 401k, profit sharing and bonus plan, group health and dental plan, short term disability, 10 holidays, 2 weeks vacation, 5 sick days.

Other Benefits: Opportunity to live and work in the beautiful coastal, Southern Maine area where great housing, excellent schools and great way of life still exist.

**Company Profile:** Mohlin & Company is a consulting engineering firm specializing in the practice of Structural Engineering. Located in Southern Maine, we have provided innovative and practical design solutions to the commercial, industrial and power industries throughout New England, the Mid-West, Mid-Atlantic and Southern U.S. for the past 26 years. Our goal is to provide our clients with the highest quality engineering possible in the most responsive and economical manner, and providing our employees with a dynamic and professional work environment with the opportunity to grow personally and professionally.
